This study aims to (1) find out and explain the effect of product placement on buying interest, (2) find out and explain the effect of product placement on buying interest which is moderated by consumer attitudes towards Lemonilo noodle products in the soap opera Ikatan Cinta. The research method used is verification, with explanatory research which aims to test hypotheses in order to explain the position between variables. The variables studied were product placement, consumer attitudes and buying interest. The respondents used were 100 people by distributing questionnaires to the public who had watched the soap opera Ikatan Cinta and knew product placement in the soap opera Ikatan Cinta. Based on the analysis, it can be concluded that product placement has an effect on buying interest, and attitudes do not moderate the relationship between product placement and buying interest. The results of the coefficient of determination test show that the contribution level of product placement and attitude towards buying interest is 52.5% and the remaining 47.5% is influenced by other factors not examined in this study.
